Mounting	**Chain hung with ceiling canopy** Wall sconces on a wood or steel backplate
Fixture weight	**See the product's spec sheet** Confirm net weight and canopy size before selecting a box

CUSTOM BUILDS AND CERTIFICATION

Custom chandeliers, pendants and sconces can carry our UL listing when built within its approved construction requirements. We confirm the proposed configuration and certification details with the project specification.

Customer-supplied antler can be used within the same requirements. Certification depends on the finished fixture's construction, components and markings.

WHAT THIS MEANS ON A JOB

- **Electrician.** Every chandelier, pendant and sconce arrives fully wired with a matching canopy. Check net weight against the outlet box and support — the larger pieces need a fixture-rated box or anchoring to structural framing.
- **Specifier.** Quote the file number on your schedule and attach this statement. Our fixtures are rated for dry locations.
- **Inspector.** The fixture carries its listing mark, and the listing can be verified independently, below.

NOT COVERED BY THIS FILE

These wired products fall outside File E238337. They are sold for residential use and should not be specified where a listed fixture is required.

Wapiti Elk Antler Floor Lamp
Kenai Moose Antler Lamp
Madison Mule Deer Antler Lamp
Silverbow Lamp
Extra Large 6 Candle Candelabra
Large Deer 3 Candle Candelabra
Medium 2 Candle Candelabra
Small Deer 1 Candle Candelabra

The candelabras carry electric candle-style lights, so they are wired fixtures despite the name. The Antler Mirror and Centerpiece are not electrical products.

VERIFY INDEPENDENTLY

Look up **File E238337** in UL Solutions' Product iQ certification database, the authoritative record. For anything this sheet does not answer — an unusual mounting condition, or a question from an authority having jurisdiction — call **(702) 861-8116** and we will answer it directly.
